

## PLASTICMETAL® HARD

**Product description:**

PLASTICMETAL® HARD is a metal sheet with heat-coated zinc layers on both sides having a softened PVC layer on the front side.

**Use:**

The product is designed as a protection against scratching and wearing of the surfaces during transportation, stocking or manipulation with semi-finished and finished products, especially plastic parts for automotive industry.

**Product information:**

- Standard product size: 1,0 x 980 x 2 400 (2 000) mm
- 4,25 - 0,25 + 0,75 mm
- Standard hardness of the softened PVC layer is  $80 \pm 4$  ShA

**Processing:**

Common tinsmith technologies (cutting, bending, riveting) can be used to process PLASTICMETAL® HARD with the exception of procedures using high temperatures (welding, soldering) which cause PVC degradation and thus deteriorating of mechanical properties of the product or its partial destruction.

**Maintenance:**

The product PLASTICMETAL® HARD does not need any maintenance during its whole shelf life.

**Guarantee:**

If processed and used properly, the producer offers a guarantee for the product according to its mechanical wear.
